

BT Cisco WebEx[®] audio integration with BT MeetMe with Dolby Voice

Add BT MeetMe with Dolby Voice reservationless audio to your Cisco WebEx so you can start and manage your calls as an online participant, directly from WebEx.

You can connect over a corporate LAN or public internet. Meetings can also include people who want to join via fixed/mobile phone (PSTN) using BT audio.

This way of calling is ideal for locations where you pay a lot in access charges or where fixed line phone and mobile access is limited.

BT MeetMe with Dolby Voice is robust, secure and scalable like BT MeetMe, and it's combined with Dolby's highest quality audio technology.

Benefits

High-quality sound — high definition combined with background noise reduction and audio levelling of each participant means you can easily tell who's speaking and when.

Voice separation — participant voices come from different directions, just like being around the meeting room table.

Choice of scheduling tools — including Cisco Productivity Tools, WebEx One Click and BT WebJoin. Never miss a meeting again.

Easy to install software — get up and running fast and always have access to the latest version.

Easy to join — you can choose the best way of joining for you from within WebEx.

Joined up audio — fully interoperable with the BT MeetMe with Dolby Voice Desktop client, Mobile app and Dolby[®] Conference Phone.

Why choose Cisco WebEx integrated with BT MeetMe with Dolby Voice?

- **All the benefits of BT MeetMe with Dolby Voice.** Better sound quality improves productivity, and when you've got crystal-clear audio, calls become less tiring and more interactive.
- **Reduce access costs.** Using your IP connection means you don't pay carrier toll fees for your audio call.
- **BT Conferencing uses and extends Cisco capabilities.** Gives you more choice from your Cisco investment by supporting flexible working styles, so you get more business done.
- **Simplicity and visibility.** At the press of a button from within WebEx you can join your audio call, see each new speaker* and enjoy the clarity of BT MeetMe with Dolby Voice.
- **Add a webcam for the complete experience.** Combine audio, video** and document-sharing, visuals and key information with your participants.

* The WebEx roster will show different icons for users joining via different methods, i.e. a phone handset for PSTN, a headset for VoIP.

** The availability of video is subject to your corporate policy.

Using Cisco WebEx integrated with BT MeetMe with Dolby Voice

- Schedule BT MeetMe with Dolby Voice calls using the standard WebEx tools including Cisco Productivity Tools, One Click and BT WebJoin.
- Using WebEx, you can connect to BT MeetMe with Dolby Voice through your computer.
- It's the same interface to join via PSTN dial back.
- Integrate BT MeetMe with Dolby Voice call by clicking on 'Call Using Computer'.
- The best experience comes from using a stereo headset.

When Cisco WebEx is used with BT MeetMe with Dolby Voice it responds to you. When you're connected, the usual BT audio integration features are available via the WebEx browser, so you can:

- access the full range of conference call control features via the WebEx interface. This includes: mute/unmute, eject, dial-out request, record/stop recording call, locking/unlocking the conference, and playing back participant names
- check actual attendance against what's expected and see who's speaking
- get directly through to dedicated BT Conferencing helpdesk support.

Also, the chairperson is able to end the conference for all users or allow the conference to continue.

Ideal for global installation

Enjoy global collaboration with any party, whether they're within your company, a customer or a supplier.

When you need to dial into your calls, we offer local access numbers in over 50 countries using our own high quality voice network.

Plus using WebEx with BT MeetMe with Dolby Voice means you can use the same browsers that you would with Cisco WebEx Meeting Center.
